

XANBOO

REMOTE MONITORING & CONTROL SYSTEM

Presented by:

STAYING CONNECTED TO YOUR HOME OR BUSINESS

Imagine being at your son's baseball game and knowing all is well at your place of business. Or being on the road and receiving real time video on your wireless phone when your children arrive safely home from school.

XANBOO has launched an innovative new monitoring service that will help customers stay more connected to their homes and businesses while they are away. The new service, which is available nationwide, enables customers to use both personal computers and wireless devices to access high-quality, streaming digital video and other real-time data and information from their homes and businesses — at virtually any time and from anywhere.

SMALL BUSINESS

Stay in Touch With The Things That Are Important To You

NANNY/PET CAM

Know When The Kids/Pets Are Up and Around

MOBILE

Monitor Construction Sites, Homes For Sale, Yachts, and More

RESIDENTIAL

Combines Remote Video Monitoring/Control and Security

DVR FOR HOME OR BUSINESS

Records 4 Cameras For 30 Days

ELDERLY PARENTS

Stay Connected With Elderly Parents Who Live Alone

The XANBOO monitoring service combines live and recorded video capabilities with a range of environmental sensor options to provide customers with a powerful, flexible tool kit to help them stay connected to the people and things they value the most.

Users can easily customize alerts and actions based on their specific needs. For example, a user can program the service to send a text message alert to a cell phone when motion is detected in an area of the home or business, while at the same time automatically turning on lighting and recording video of the same area.
